

IS52018C 2017-18 Final Presentation

This will consist of a presentation of about 10 minutes followed by a question session. The presentations will be scheduled during the last two weeks of term 2. All groups must upload their slides by 4pm, Friday March 9th.

The aim of the presentation is to give a brief overview of your entire project. You should cover your motivation, aims/objectives, design, development process, outcomes to date and testing and evaluation.

The presentation will be assessed on:

- How clearly you describe the purpose and functioning of your system.
- Your account of the software development process.
- Technical testing and user evaluation of the software in terms of the original requirements.
- The quality of the presentation and how you handle any questions.

As a rule of thumb, you should allow roughly two minutes per slide, not counting the title and references. The title slide should include the name of your project, group ID and names of all group members.

Each group will be allocated a specific date and time. If you are not in college for the presentation, you will receive a mark of zero.
