1 HOME PAGE

Upon loading the application, the user is faced with the homepage. This page will allow/request the user to input/login with their email/username or continue as a guest.

2 SERVICE SELECTION

Once the user has successfully signed in to the application, they can select the service they wish to utilise. Which can either be a map of their current location detailing nearest museums/exhibitions, the navigation feature* which navigates the user to their desired destination (a museum or exhibition) and finally an "info" page which the user can find out further information about a specific exhibit.

* The navigation will take the user to the "user destination" page (4).
